175 H1 – Temperature & Humidity Data Logger

Overview

The 175 H1 data logger measures, monitors and logs the temperature and relative humidity in buildings and closed rooms. The logger comes with an external humidity sensor (stub) for shorter reaction times and a lock to prevent it from being easily stolen or tampered with.

Features

• Dual measurements (1 internal, 1 external) for ambient temperature & humidity monitoring
• Large memory, 1 Million Readings
• Data transfer possible using the USB port or SD card (Optional)
• Free data logger software available for download
