

835T2 High Temp. IR Thermometer Overview

Measure precise temperatures of up to 1500°C from a safe distance thanks to its extended temperature measuring range, Testo 835T2 can be used virtually all sectors of trade and industry: e.g. monitoring wall temperature, inspecting air conditioning and ventilation systems, the maintenance of industrial systems or the quality control of industrially manufactured products.

Features

- Measure up to 1500°C
- 4-point laser shows the exact measuring range
- 50:1 optics
- Integrated emissivity measurement
- Convenient menu guidance with icons and joystick
- Measuring value and location memory, and data analysis on the PC
