

## **925 - Probe Thermometer Overview**

The Testo 925 temperature measuring instrument is our all-rounder for temperature measurement in heating engineering, the sanitation sector and refrigeration and air conditioning technology. Take advantage of the thermocouple technology of the attachable temperature probes (type K thermocouple) with this temperature measuring instrument. It enables fast temperature checks and a large temperature measuring range from -50 to +1000 °C (the measuring range is dependent on the probe selected).

### **Features**

- Fast reaction times
- Audible alarm, user-defined thresholds
- HACCP Certified
- Clear 2 line display
