

SPG-DIGI Digital Pressure Gauges Overview

The SPG-DIGI Digital Pressure Gauges are intended to measure and display pressures in hydraulic systems, particularly for oils, lubricants and water. They can display the current measured values, as well as minimum and maximum values, with an accuracy of 0,5 % of full scale.

Features

- Bar graph display (drag indicator) • Background lighting
- Zero correction
- Battery charge display
- With the CE mark
- Housing made of die-cast Zinc with TPE rubber protective covering
- Text display 4 1/2-digit
- Size: 50 x 34 mm / 1.97 x 1.34 in
- Actual value display: 15 mm / .59 in
- MIN-/MAX or FS* display: 8 mm / .31 in
- Units: bar, PSI, MPa, kPa, mbar
- Peak pressure measurement with 10 ms sampling rate
- Lighted measured value display
