

TorcStark CLCD Series Wheel Torque Wrench Overview

- *It solves the problems of small distance between bolts and pipelines, and limited space in height.
- *Applicable to match normal API flanges.
- *Small head radius, suitable for small space
- *Made of high strength alloy steel, more durable.
- *The power head is interchangeable with KLCD series.
- *Attention: Run the pump as return direction to take wrench down when every cycle is finished, then reposition.
- *This model does not have retaining function.

Features

- Model: CLCD
- Tool type: Low profile with wheel
- Torque range: As per request
- A/F range: As per request
- Brand: TorcStark
- Origin: Made in China
- Warranty: One year
- Packing: Double packing, Aluminium plastic box + wooden box

Model	Max working pressure	Max torque	Nut range	8CLCD	50MPa	11550Nm	75-95mm
